2000

Clear Lighting was founded

2003

ISO 9001 was certified

2006

Invention patent was awarded in Germany

2008

World's thinnest LED strip was launched

2009

Clear optoelectronics laboratory was built

2011

Huizhou production base was built

2012

High brightness neon ribbon light "Artist Series" was launched

2013

Trademark was registered in Europe

History

2000-2014

Company profile

[Positioning]

We have always focused on LED Neon Ribbon Light and LED Crystal Ribbon Light. In this niche market, our business integrated design, R&D, manufacturing, marketing and customer service. We will not produce full range of LED products to satisfy all customers, but to meet all demands of customers who need high end LED flex ribbon light.

[R&D]

Clear Lighting has a strong R&D team to make quick reaction to new tread of LED ribbon light market. We respect the protection of patent, and we realize the importance to develop new technology and apply patents. As a result, 70 patents have been awarded including patents obtained in Germany, US and European Union. 14 years technology accumulation and talent cultivation make us the leader in this field. We will keep innovating to be the specialist of LED flex ribbon light.

[Products]

Our products have superior performance on water proof, DIY cutting & connecting accessories, and uniform neon light effect. We give adequate consideration on product UV resistance, corrosion resistance, impact resistance and flame resistance to ensure that products meet the requirements of various applications, and we have passed relevant tests of third party inspection authority. We have UL and CE certificates for all our products.

[Service]

For a dozen years, our products have been applied to main countries in the world. We respect our customers and position ourselves as their business partner. Short lead time, promotion consultancy, project solution, and holistic after-sales services constitute the added value we provide to our honored customers; they are members of Twinkling Club. We are trying to give better experience to Twinkling Club members who are selling and using our products. Expertise and earnest make us capable of delighting them by defining new standards.

[Intellectual Property]

Clear Lighting has high consciousness of the importance of Intellectual Properties protection, we have solely owned 70 patents by March of 2013.

LED Neon Ribbon Light

C-FR-F10B

The smallest profile, flat surface

Features

1. High quality SMD LED chip
2. UV & flame resistant construction (PVC)
3. Slim size with flat surface for slimline projects
4. Uniform & even light source with no LED "hotspots"
5. Flexible with 90mm Minimum bending diameter
6. Easy to use, with DIY accessories for joining, terminating, mounting & powering
7. High IP rating (IP68)
8. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
9. Continuous length up to 100m
10. Environmentally friendly & energy efficient
11. Automated production, high reliability & long warranty
12. 5 years life span

Application

Smallest profile of the Linear LED lights, it is also the most flexible with the smallest cutmark. Suitable for finer detailed work including signage, architectural features and sculptures

Flat profile, full color jacket

Features

1. High quality SMD LED chip
2. Full color Jacket (when not illuminated, color is visible)
3. UV & Flame resistant construction (PVC)
4. Flat profile
5. Uniform & Even light source with no LED "hotspots"
6. High illumination
7. Flexible with 120mm minimum bending diameter
8. Easy to use, with DIY accessories for joining, terminating, mounting & powering
9. High IP rating (IP68)
10. Ambient temperature: $-20^{\circ}\text{C} \sim 45^{\circ}\text{C}$;
Operating temperature: $0^{\circ}\text{C} \sim 45^{\circ}\text{C}$
11. Continuous length up to 100m
12. Environmentally friendly & energy efficient
13. Automated production, high reliability & long warranty
14. 5 years life span

Application

The perfect replacement for Glass Neon. Easy to use, long lasting & Durable. Suitable for many projects and installations including indoor, outdoor, signage & architectural. The color jacket ensures that colors are visible in direct sunlight

Flat profile, color jacket

Features

1. High quality SMD LED chip
2. Color Jacket (when not illuminated, color is visible)
3. UV & Flame resistant construction (PVC)
4. Flat profile
5. Uniform & even light source with no LED "hotspots"
6. High illumination
7. Flexible with 120mm minimum bending diameter
8. Easy to use, with DIY accessories for joining, terminating, mounting & powering
9. High IP rating (IP68)
10. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
11. Continuous length up to 100m
12. Environmentally friendly & energy efficient
13. Automated production, high reliability & long warranty
14. 5 years life span

Application

The perfect replacement for Glass Neon. Easy to use, long lasting & Durable. Suitable for many projects and installations including indoor, outdoor, signage & architectural. The color jacket ensures that colors are visible in direct sunlight

C-FR-F15S

Flat profile, programmable light

Features

1. High quality SMD, LED Chip & IC Chip (Chasing)
2. UV & Flame resistant construction (PVC)
3. Flat profile
4. Uniform & even light source with no LED "hotspots"
5. High illumination
6. Flexible with 120mm minimum bending diameter
7. Easy to use, with DIY accessories for joining, terminating, mounting & powering
8. High IP rating (IP68)
9. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
10. Continuous length up to 15m
11. Environmentally friendly & energy efficient
12. Automated production, high reliability & long warranty
13. 5 years life span

Application

F15S allows for advanced chasing and programmable scenes. Perfect for creating a stunning visual display. Achieve advanced lighting scenes easily with its inbuilt IC and control gear. Suitable for architectural, stage, indoor & outdoor applications

Large viewing angle, full color jacket

Features

1. High quality SMD LED chip
2. Full color Jacket (when not illuminated, color is visible)
3. UV & flame resistant construction (PVC)
4. Domed profile for large viewing angles (270°)
5. Uniform & even light source with no LED "hotspots"
6. High illumination
7. Flexible with 120mm minimum bending diameter
8. Easy to use, with DIY accessories for joining, terminating, mounting & powering
9. High IP rating (IP68)
10. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
11. Continuous length up to 100m
12. Environmentally friendly & energy efficient
13. Automated production, high reliability & long warranty
14. 5 years life span

Application

The perfect replacement for Glass Neon, easy to use, long lasting & Durable. Suitable for many projects and installations including indoor, outdoor, signage & architectural. The color jacket ensures that colors are visible in direct sunlight.

C-FR-F21S

Large viewing angle, programmable light

Features

1. High quality SMD, LED Chip & IC Chip (Chasing)
2. UV & flame resistant construction (PVC)
3. Domed profile for large viewing angles (270°)
4. Uniform & even light source with no LED "hotspots"
5. High illumination
6. Flexible with 120mm minimum bending diameter
7. Easy to use, with DIY accessories for joining, terminating, mounting & powering
8. High IP rating (IP68)
9. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
10. Continuous length up to 15m
11. Environmentally friendly & energy efficient
12. Automated production, high reliability & long warranty
13. 5 years life span

Application

F21S allows for advanced chasing and programmable scenes. Perfect for creating a stunning visual display. Achieve advanced lighting scenes easily with its inbuilt IC and control gear. Suitable for architectural, stage, indoor & outdoor applications

C-FR-F22B

Very high illumination, perfect uniform & even light

Features

1. High quality SMD LED chip
2. UV & flame resistant construction (PVC)
3. Extremely flat profile for slimline projects
4. Perfect uniform & even light source with no LED "hotspots"
5. Very high illumination
6. Easy to use, with DIY accessories for joining, terminating, mounting & powering
7. High IP rating (IP68)
8. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
9. Continuous length up to 15m
10. Environmentally friendly & energy efficient
11. Automated production, high reliability & long warranty
12. 5 years life span

Application

It is one of the brightest flexible LED lights on the market. Its high light output makes it suitable for a wide range of lighting tasks including indoor, outdoor, sculptures and architectural features

Ultra slimline profile, color changing, transparent jacket

Features

1. High quality SMD, RGB LED chip
2. UV & Flame resistant construction (PVC)
3. Transparent jacket
4. Small design with custom PCB for optimum thermal management
5. High illumination
6. Very Flexible (5cm minimum bending diameter)
7. Easy to use, with DIY accessories for joining, terminating, mounting & powering
8. High IP rating (IP40)
9. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
10. Continuous length up to 10m
11. Environmentally friendly & energy efficient
12. Automated production, high reliability & long warranty
13. 5 years life span

Application

The ultra slimline profile enables a wide range of lighting applications, including cove lighting, accent lighting and back lighting. RGB LEDs allow for a wide range of colors or color changing options.

C-FR-F16B

Ultra slimline profile, color changing, ivory white jacket

Features

1. High quality SMD, RGB LED chip
2. UV & Flame resistant construction (PVC)
3. Ivory white jacket
4. Small design with custom PCB for optimum thermal management
5. Very high illumination
6. Very Flexible (5cm minimum bending diameter)
7. Easy to use, with DIY accessories for joining, terminating, mounting & powering
8. High IP rating (IP40)
9. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
10. Continuous length up to 10m
11. Environmentally friendly & energy efficient
12. Automated production, high reliability & long warranty
13. 5 years life span

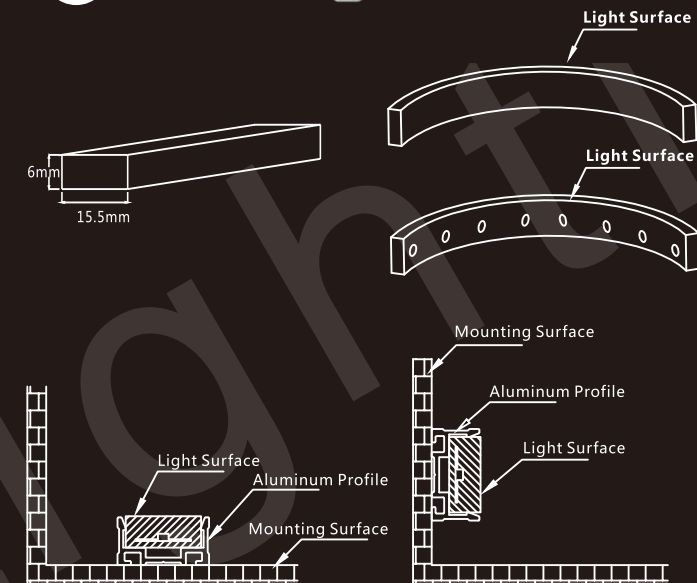

Application

The ultra slimline profile enables a wide range of lighting applications, including cove lighting, accent lighting and back lighting. RGB LEDs allow for a wide range of colors or color changing options.

C-FR-F16C

Ultra slimline profile, color changing, black jacket

Features

1. High quality SMD, RGB LED chip
2. UV & Flame resistant construction (PVC)
3. Black jacket
4. Small design with custom PCB for optimum thermal management
5. Very high illumination
6. Very Flexible (5cm minimum bending diameter)
7. Easy to use, with DIY accessories for joining, terminating, mounting & powering
8. High IP rating (IP40)
9. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
10. Continuous length up to 10m
11. Environmentally friendly & energy efficient
12. Automated production, high reliability & long warranty
13. 5 years life span

Application

The ultra slimline profile enables a wide range of lighting applications, including cove lighting, accent lighting and back lighting. RGB LEDs allow for a wide range of colors or color changing options.

Ultra slimline profile, programmable light

Features

1. High quality SMD, LED Chip & IC Chip (Chasing)
2. UV & flame resistant construction (PVC)
3. Jackets available: transparent, ivory white and black
4. Small design with custom PCB for optimum thermal management
5. High illumination
6. Very flexible (5cm minimum bending diameter)
7. Easy to use, with DIY accessories for joining, terminating, mounting & powering
8. High IP rating (IP40)
9. Ambient temperature: $-20^{\circ}\text{C} \sim 45^{\circ}\text{C}$;
Operating temperature: $0^{\circ}\text{C} \sim 45^{\circ}\text{C}$
10. Continuous length up to 15m
11. Environmentally friendly & energy efficient
12. Automated production, high reliability & long warranty
13. 5 years life span

Application

The ultra slimline profile and light chasing effect enable a wide range of lighting applications including, cove lighting, accent lighting and back lighting

C-FR-F17A

Ultra slimline profile, very high illumination, transparent jacket

Features

1. High quality SMD LED, bin controlled within 3 MacAdam ellipses
2. Wide range of white color options (2000k-6500k)
2. UV-resistant and flame resistant PVC materials
3. Transparent jacket
4. Compact and rugged, sufficient thermal management
5. Ultra high brightness
6. 3cm minimum bending diameter
7. Convenient DIY accessories for fieldwork (cut and reconnect)
8. Protection Rating up to IP40
9. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
10. Life span: 5 years
11. Continuous length up to 15m
12. Eco-friendly and energy saving
13. Full automatic production and stable quality

Application

Perfect for indirect lighting like background lighting, due to the shallow design, small bending diameter and high IP rating, it offer a wide range of application possibilities

C-FR-F17B

Ultra slimline profile, very high illumination, ivory white jacket

Features

1. High quality SMD LED, bin controlled within 3 MacAdam ellipses
2. Wide range of white color options (2000k-6500k)
2. UV-resistant and flame resistant PVC materials
3. Ivory white jacket
4. Compact and rugged, sufficient thermal management
5. Ultra high brightness
6. 3cm minimum bending diameter
7. Convenient DIY accessories for fieldwork (cut and reconnect)
8. Protection Rating up to IP40
9. Ambient temperature: $-20^{\circ}\text{C} \sim 45^{\circ}\text{C}$;
Operating temperature: $0^{\circ}\text{C} \sim 45^{\circ}\text{C}$
10. Life span: 5 years
11. Continuous length up to 15m
12. Eco-friendly and energy saving
13. Full automatic production and stable quality

Application

Perfect for indirect lighting like background lighting, due to the shallow design, small bending diameter and high IP rating, it offer a wide range of application possibilities

C-FR-F17C

Ultra slimline profile, very high illumination, black jacket

Features

1. High quality SMD LED, bin controlled within 3 MacAdam ellipses.
2. Wide range of white color options (2000k-6500k)
2. UV-resistant and flame resistant PVC materials
3. Black jacket
4. Compact and rugged, sufficient thermal management
5. Ultra high brightness
6. 3cm minimum bending diameter
7. Convenient DIY accessories for fieldwork (cut and reconnect)
8. Protection Rating up to IP40
9. Ambient temperature: -20°C~45°C;
Operating temperature: 0°C~45°C
10. Life span: 5 years
11. Continuous length up to 15m
12. Eco-friendly and energy saving
13. Full automatic production and stable quality

Application

Perfect for indirect lighting like background lighting, due to the shallow design, small bending diameter and high IP rating, it offer a wide range of application possibilities

TOOLS

MINI TOOLS CASE

To provide better customer experience, we launched a set of tool kit to make it more convenient for using our products.

Cutter: Easy to use even for ladies. With this innovative tool, people could cut the light to get a flat and smooth cross section and achieve IP68 waterproof with front connectors and end cap.

Insert inducer: As our light is capsulated by PVC, electrode may be very close to PVC. Insert inducer will help you get them apart easily to find the copper and to install the connector.

Note: Do not insert the inducer too deeply; 5-10mm is enough.

Gripper: It is to finish mechanical clasp connector assembly. After pushing anti-skidding clip into U Steel plate, place it in right setting slot against the U Steel Plate. With U Steel Plate as fulcrum, rotate gripper by lever principle until hearing sound of snap-in or seeing popup of shrapnel on Anti-skidding Clip

Cutter

Open it

Cut the light vertically

Cut

Place the gripper

Rotate the gripper

Till shrapnel popup

Insert inducer

Controller

Working voltage: DC12V	Input voltage: DC5V~DC24V	Input signal: DMX512
Output signal channels: 16 channels	Input Signal: DMX512	Input voltage: DC5V~DC24V
Input & output interface: RJ45	Output signal: SPI	Max current load: 6A/CH×3CH 18A Max
Loading capability: >512-1920 pixels/channel	(compatible with TM1803, TM1804, Tm1809, Tm1812, UCS1903, UCS1909, UCS1912, UCS2903, UCS2909, UCS2912, WS2811 driving IC)	Max output power: 216W/432W(12V/24V)
Grey level: Max 65536 scale(64K)		Output Gray Scale: 256 levels/CH(8bit/CH)
Refreshing frequency: 60Hz~3000Hz		DMX512 socket: XLR-3, RJ45, Green terminal
Online transmission mode: TCP/IP Protocol	Decoding Channels: 512 channels/unit	Dimension: L163×W78×H40mm
Off-line storage media: Max.2GB SD card	Output Grey Scale: 256 levels/CH(8bit/CH)	Weight(G.W): 340g
The 3th interface: DMX512/1990 Protocol	DMX512 Connector: XLR-3, Green terminal	
Dimensions: L197XW120XH47(mm)	Dimension: L125×W52×H40mm	
Weight (G.W.): 1350g	Weight (G.W): 300g	

Working Voltage: DC12V	Input voltage: DC5V~DC24V	Input Voltage: DC5V Li-Battery	Power Supply Chosen:DC CV SMPS
Power Consumption: <2W	Max current load: 8A ×3CH Max 24A	Working Current: <30mA	Input Voltage: DC12V~DC24V
Output Signal: DMX512	Max output power: 120W/288W/576W(5V/12V/24V)	Working Frequency: 2.4GHZ	Max Current Load: 5Ax 3CH Max 15A
Output Loop: 1 Port		RF Remote Distance: 30m	Max Output Power: 180W/360W(12V/24V)
Transmission Speed: 250Kbps	Function Mode: 25 modes	Remote Option: Sync Control	Change Mode: 32 Fantastic modes
Function Mode: 39 modes	Scale Levels: 1024×1024×1024	Battery Capacity: 1000mAh	Control Button: 8 touch buttons
Control Quantity: 170 pixels	Dimension: L170×W64×H44mm	Standby Time: 6 months	Grey Scale Levels: 1024x1024x1024
Dimensions: L163×W108×H40mm	Weight (G.W): 200g	Normal Using Time: 30 days	Compatible Remote Control:T3/T3M/T3X
Weight(G.W): 760g		Dimensions: L145×W55×H22(mm)	Dimensions: L211×W40×H30(mm)
		Weight (G.W.): 200g	Weight (G.W.): 180g

Type 5. Working with IC-UCS2903 Compatible Controller, Multi Power Supply and Chasing Light.

Best Practice

for Good User Experience

Artist and Galaxy are our main product categories. This helpful guide will not only reduce the possibility of damage caused by improper use of the categories, but also let you understand how to make the light work well in a long life time.

We recommend people who store, unpack, install, replace and maintain the light to read the guide before their action. We believe this will lead to a better experience for your using Artist and Galaxy.

1. Storage and Transport

1.1 Ensure the ribbon installed with front connectors and end caps or covered with black protection caps in storage and transport state.

For Artist category (F10,F15, F21,F22)

For Galaxy category (F16, F17)

1.2 Storage and transport temperature : -20~60°C.

1.3 Don't stress.

2. Unpacking and Encasement

2.1 If you need to test the ribbon lighting effect, please take out the whole inner blister, but no need to diffuse ribbon light, install front connector and correctly power the ribbon light less than 1 minute to avoid excessive heat.

Single end connection for Max. length 10m

Double ends connection for Max. length 20m

2.2 Always follow indication to pull out inner blister about 10CM and then pull the ribbon light slowly , or reversely pull out the ribbon light. Never twist.

2.3 If you encase the unrolled ribbon light, cooperate with another person and bend it in correct direction into inner blister. Do not unroll if not use.

The correct bending direction for side view ribbon light (F15, F21) is with print letters on light PVC outwards; and for top view ribbon light (F16, F17) with light surface outwards. Or you can refer to original packing.

For side view light: F10, F15, F21

For top view light: F16, F17, F22

3. Assembling Accessory

- 3.1 Always follow User Manual to assemble accessories.
- 3.2 Only use accessories manufactured or approved by CLEAR Lighting.
- 3.3 This product must be assembled by qualified specialist to ensure electrical function and waterproof protection.
- 3.4 Always follow User Manual to cut the ribbon light correctly: Vertically cut the ribbon light along the cutting line. We recommend using cutter (shearing tool sold separately by Clear Lighting).

The correct cutting way, $R=90^\circ$ ✓

Wave cutting is incorrect ✕

$R \neq 90^\circ$ is incorrect ✕

3.4 Only cut the ribbon light at cutting mark (scissor, cutting line, visible PCB joint).

For Artist category (F10, F15, F21, F22)

For Galaxy category (F16, F17)

3.5 Make sure the section is flat after cutting. Trim the PCB if it is extruded.

3.6 Pay attention to the correct insert position of front connector metal pins.

For Artist category (F10, F15, F21)

01 type connector

02 type connector

For Galaxy category (F16, F17)

01/02 type connector

Installation Tools

Recommend using dedicated inducer (sold separately) to help install. Insert the inducer in the crack between PCB back and thinner PVC side, spread and make space between them. Then along the inducer insert front connector pin in correct polarity. Pull out inducer lastly.

For Artist category (F10, F15, F21)

For Galaxy category (F16, F17)

3.7 Select proper 01 or 02 type front connector based on PCB position in the section view of ribbon light.

For Artist category (F10, F15, F21) 01 type connector

Top-view

Back-view

For Galaxy category (F16, F17) 01 type connector

Top-view

Back-view

For Artist category (F15, F21) 02 type connector

Top-view

Back-view

For Galaxy category (F16, F17) 02 type connector

Top-view

Back-view

3.8 When install IP68 connector, make sure that there is no space at the bottom between anti-skidding slip and light, no space between anti-skidding slip ear and light section.

3.9 Always follow User Manual to assemble IP68 connectors.

For Artist category (F15, F21) IP68

Always make sure all the connectors are screwed tightly by diagonal sequence.

4. Mounting

4.1 Always follow User Manual to mount. This product must be installed by qualified worker.

4.2 Before installation ensure power is switched off.

4.3 It is better to test the Red, Green and Blue channel respectively before RGB Light installation, then connect the RGB light to the RGB controller if each channel works well.

4.4 Only use the power supply provided or recommended by manufacturer. And the power supply must be constant voltage (CV) output and has over load protection, over voltage protection and short protection functions. CE and UL certificated power supplies are recommended.

4.5 The power supply load capacity must be higher than total ribbon light load power. 80% load rate is better to ensure your ribbon light life span.

4.6 The max running length must not exceed specified value in instruction manual. Do not over load.

4.7 Only use correct polarity and voltage. Do not power the DC light using high voltage.

4.8 For installation you should use aluminum channel, clip or other mounting accessories proved by **CLEAR Lighting**, especially the product is installed to hang or suspend freely.

4.9 Make sure the product installation is in correct bending direction.
The correct bending direction for side view ribbon light (F10, F11, F15, F21) is with print letters on light PVC outwards; and for top view ribbon light (F16, F17, F22) with light surface outwards. Or you can refer to original packing.

4.10 Please note the minimum bending diameter in Specification or User manual.

4.11 When aluminum profile is used to install the product, take care not to fix the parts with a hammer or other tool, use hands to press the light slightly from one end to the other into aluminum profile. Do not install from both ends to middle that may cause bump. When removing the ribbon light out of channel, elevate one end of the ribbon light gently and gradually till another end.

Installation diagram :

Remove diagram :

4.12 No twisting during installation.

4.13 Ribbon light bending operation temperature : 0~45°C;
After installation working ambient temperature : -20~45°C

4.14 IP40, IP68 protection rate are based on lab environment test. Harsh operating environment (Large variation of temperature frequently in a short period of time, overheating, strong mechanical pressure etc.) will accelerate aging and degrade water resistance.

4.15 Do not position this product near heaters or any direct source of heat. Operate in a chemical hazardous free environment. Excess acidic, alkaline, radioactive, corrosive gas etc. conditions will affect your ribbon light PVC protection.

Recommend using special self-locking aluminum profile for easy installing and dismounting.

1). Luminous Flux (Ø)
The SI unit of luminous flux is the lumen (lm). The luminous flux Ø [lm] indicates all the radiated power emitted by a light source in all directions.

3). Beam angle (unit: ±)
The beam angle is the angle between the two directions opposed to each other over the beam axis for which the luminous intensity is half that of the maximum luminous intensity. Beam angle can tell people how the beam transmits from beam axis.

2). Candela
The candela is the SI base unit of luminous intensity; that is, power emitted by a light source in a particular direction
Luminous intensity in different directions is different from a particular light source.

4). Lux (lx)
The lux (symbol: lx) is the SI unit of illuminance and luminous emittance measuring luminous power per area.
1lumen/ ft^2=1foot candlepower
1lumen/m^2=1 lux

5). Correlated Color Temperature (CCT)

The black-body radiator appears of different colors when heated in correlated temperatures. CCT refers to the temperature when the color of the heated black-body radiator corresponds to that of the light source.

CCT range and standard, referring ANSI_NEMA_ANSLG C78.377-2008

Measurement of chromaticity shall be made in accordance with methods given in the measurement standard IESNA LM-79.

Nominal CCT Categories

Nominal CCT	Target CCT and tolerance(K)	Target Duv and tolerance
2700K	2725 ± 145	0.000 ± 0.006
3000K	3045 ± 175	0.000 ± 0.006
3500K	3465 ± 245	0.000 ± 0.006
4000K	3985 ± 275	0.001 ± 0.006
4500K	4503 ± 243	0.001 ± 0.006
5000K	5028 ± 283	0.002 ± 0.006
5700K	5665 ± 355	0.002 ± 0.006
6500K	6530 ± 510	0.003 ± 0.006

Notes:Six of the nominal CCTs correspond to those in the fluorescent lamp specification : 2700 K, 3000 K (Warm White), 3500 K (White), 4100 K (Cool White), 5000 K, and 6500 K (Daylight), respectively.

6). Color Rendering Index (CRI)

The color rendering index (CRI) (sometimes called color rendition index), is a quantitative measure of the ability of a light source to reproduce the colors of various objects faithfully in comparison with an ideal or natural light source.

7). Luminous Efficacy (lumen/watt)

Luminous efficacy is a measure of how well a light source produces visible light. It is the ratio of luminous flux to power.
[Luminous efficacy = lumen/watt]

8). Lumen Maintenance

Lumen maintenance is the luminous flux output remaining output (typically expressed as a percentage of the maximum output) at any selected elapsed operating time. Lumen maintenance is the converse of lumen depreciation.

9). SDCM & MacAdam Ellipses

SDCM is an acronym which stands for Standard Deviation Colour Matching. SDCM has the same meaning as a “MacAdam ellipse” . A 1-step MacAdam ellipse defines a zone in the CIE 1931 2 deg (xy) color space within which the human eye cannot discern color difference. Most LEDs are binned at the 4-7 step level, in other words you certainly can see colour differences in LEDs that are ostensibly the same color.

These are the three sizes often used in the color specifications for light sources. In particular, the 7-step is the standard for color consistency in CFL lamps and in ANSI/NEMA/ANSLG C78.377-2008 American National Standard for Specifications for the Chromaticity of Solid State Lighting (SSL) Products (which is a standard for white light, not colored). 7-step ellipse centered on 3200 K covers a very broad area and spans a 500 K range of color temperatures from 2950 K to 3450 K. The 4-step and 2-step ellipses are tighter standards, which are standards that many light source manufacturers are already working to. The 4-step ellipse is also the standard to which many entertainment industry HID lamps, such as MSR and HMI, have been manufactured for many years.
